16th February 2005

Dear Colleague,

Further to the recent EN2004 Mentor Graphics update, I am pleased to inform you that the electronic media (i.e., the media not available on cdrom) of this year's release is now ready for you to download from our RAL ftp site. The electronic media consists of the following tools:

(1) FormalPro version 2004.4 for the Operating Systems: HP-UX 11.0, Linux RH 8/9 RHEL3 and Solaris 7/8.

(2) TeraPlace version 2.2.8 for the Operating Systems: HP-UX 9.05/9.07/10.2 and Solaris 2.5/2.51/2.6.

(3) Seamless CVE version 5.3_2.1 for the Operating Systems: HP-UX 11.0, Linux RH 7.2 and Solaris 7.

(4) SST Velocity version 3.4_1.2 for the Operating Systems: Linux RH 9 and Solaris 8.

(5) MachTA version 3.3_0.7 for the Operating Systems HP-UX 11.0, Linux RH 7.2/8.0 and Solaris 8/9.

To download the above products, you need to access our ftp site using the following steps:

(1) From your chosen platform, invoke a web browser.
(2) Ensure your web browser preferences have set your identity to send your email address as anonymous FTP password (see your administrator for further information on this).
(3) In the web browser, type ftp://ftp.te.rl.ac.uk
(4) Change directory to /outgoing/mentor/en2004
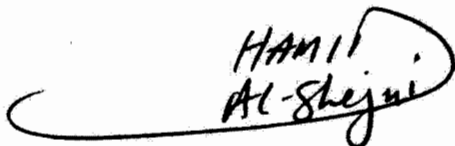

EUROPRACTICE
