Dear Colleague

EUROPRACTICE/Mentor Graphics 2007 Release – READ ME!

The Microelectronics Support Centre at RAL is pleased to be able to send you software from the EUROPRACTICE/Mentor Graphics 2007 Release.

The purpose of this letter is to explain the contents of the shipment.

Obtaining Support
We would like to remind you that the conditions of the EUROPRACTICE Agreement, which your institution has signed, does not allow you to contact Mentor Graphics directly for support. Access to Mentor Graphics web pages (SupportNet) is permitted, although you should not report support enquiries through this method.

Obtaining Supplementary Installation Information
Additional, up-to-date advice on installation of the EUROPRACTICE configurations can be obtained from our anonymous FTP server. A plain text index file describes what EUROPRACTICE installation documents are currently available and how to find them on the FTP server. The directory containing the index file is blind (you cannot use **ls/dir** commands). Access the index file, as described below, and follow the instructions in it to get additional installation guidance for the packages which you wish to install.

```
> ftp ftp.msc.rl.ac.uk
Connected www.te.rl.ac.uk.
220 Welcome to STFC Technology's FTP service.
