

EDM Group Friday Seminars: Michaelmas 2003

Lecture Room 3B-4 pm

- 10th October 2003 Prof. John Robertson *High K Oxides for Future CMOS*
(EDM Group, CUED)
- 17th October 2003 Dr Bojan Boskovic *Room and Low Temperature Synthesis of Carbon Nanofibres*
(EDM Group, CUED)
- 24th October 2003 Dr Kenneth B.K. Teo *Careful Experimentation*
(EDM Group, CUED)
- 31st October 2003 Dr Mark Huges *Carbon Nanotube-Conducting Polymer Nanocomposites for Electrochemical Devices*
(Materials Science and Metallurgy, Cambridge)
- 7th November 2003 Dr Valeri Afanasiev *Internal Photoemission Over High-k Insulating Barriers*
(Department of Physics and Astronomy, Katholieke Universiteit Leuven)
- 14th November 2003 Ms Janina Maultzsch *Raman Scattering from Graphite and Carbon Nanotubes*
(Physics Department, Technical University, Berlin)
- 21st November 2003 Dr Gabor Csanyi *Hybrid Classical and Quantum Mechanical Simulations*
(Cavendish Lab, Cambridge)
- 28th November 2003 Dr Zvonimir Bandic, *Flexible Magnetics on Plastic Substrates: Magnetic Lithography and Other Applications*
(Hitachi Research, San Jose, USA)
- 5th December 2003 Dr Veli-Matti Tiainen *Ultra-Thick ta-C Coatings*
(Department of Physical Sciences, University of Helsinki, Finland)
- 12th December 2003 Mr Young Jin Choi *Thin-film transistors fabricated by VHF PECVD*
(EDM Group, CUED)
